

LED Drivers from Thomas Research Products include a datecode label with a barcode or QR code and information critical to traceability. The style of machine code is specific to each product line. This document is designed to help you understand each code.

PROGRAMMABLE

SelectSYNC 25W, 40W Compact Drivers

The 12-digit alphanumeric number under the machine code reads this way:

YYWWFC123456

YYWW = Date Code (YY = Year, WW = Week)

FC = Factory Code (2 digits)

123456 = Serial Number (6 digits)

PROGRAMMABLE

SelectSYNC 40W, 75W Linear Drivers

The 4-digit numeric number above the machine code reads this way:

WWYY

YYWW = Date Code (YY = Year, WW = Week)

PROGRAMMABLE

SelectSYNC 30W/50W Linear, 27W Drivers

The 4-digit serial number 10-digit manufacturing date under the machine code reads this way:

Serial No: 1234

Mfg Date: YYYY/MM/DD

These drivers also note the Hardware and Firmware rev.

CLASSIC

PLED Series Drivers

The 11-digit alphanumeric number under the machine code reads this way:

YYWWFC12345

YYWW = Date Code (YY = Year, WW = Week)

FC = Factory Code (2 digits)

12345 = Serial Number (5 digits)

Reading LED Driver Date Codes

CLASSIC

LED Series Drivers

The 11-digit alphanumeric number under the machine code reads this way:

YYWWFC12345

YYWW = Date Code (YY = Year, WW = Week)

FC = Factory Code (2 digits)

12345 = Serial Number (5 digits)

OBSOLETE

LEG Series Drivers

The 11-digit alphanumeric number under the machine code reads this way:

YYWWFC12345

YYWW = Date Code (YY = Year, WW = Week)

FC = Factory Code (2 digits)

12345 = Serial Number (5 digits)

OBSOLETE

TRC/TRV Series Drivers

The 12-digit alphanumeric number to the right of the part number, above the machine code reads this way:

123456XFWWYY

123456 = Serial Number (6 digits)

X = Product Code (1 digit)

F = Factory Code (1 digit)

WWYY = Date Code (WW = Week, YY = Year)

OBSOLETE

LED-M Series Metal Case Drivers

The 13-digit number under the machine code reads this way:

F1234YYWW5678

F = Factory Code (1 digit)

YYWW = Date Code (YY = Year, WW = Week)

1234 / 5678 = Serial Number (8 digits)

OBSOLETE

LED-M Series Plastic Case Drivers

The 10-digit number under the machine code reads this way:

12YYWW1234

12 = Product Code (2 digits)

YYWW = Date Code (YY = Year, WW = Week)

1234 = Serial Number (4 digits)

(Possible 11th digit = Factory Code)
